

## Bean ANTIGUA BUSH BEAN

Very upright, 18" tall. Excellent disease resistance. Uniform pods suitable for mechanical harvests.

*Courtesy of High Mowing Organic Seeds*

## Bean BAI BU LAO

White pole bean. The pods are 10 to 12" long and half an inch wide. Stringless, and stay tender for a long period without fibrosis. Tolerant to cold and diseases. High yield.

*Courtesy of Agrohaitai*

## Bean BUSH BEAN SPEEDY

A European variety with the ability to produce under cover or shorter day conditions. Early, flavourful, and productive on strong, disease tolerant plants.

*Courtesy of William Dam Seeds*

## Bean DESPERADO

Well adapted for heat/stress tolerances. Excellent germination and plant vigor. High tolerance to BCMV. Maturity: 53 days.

*Courtesy of Stokes*

## Bean LASALLE

High yielding, dark, easy to harvest three to four sieve bean with high consistent yields. Good heat resistance. Tolerant to CBMV, Halo Blight and Brown Spot. Maturity: 54 days.

*Courtesy of Stokes*

## Bean SEYCHELLES POLE BEAN

Quality stringless pods with an archipelago of tender, small seeds inside each. Vigorous plants produce round pods in clusters of six for an easy and continuous harvest.

*Courtesy of High Mowing Organic Seeds*

## Beet BOHAN

This eye catching new beet has very smooth skin and a round shape. It has vigorous, strong, clean tops. Maturity: 52 days.

*Courtesy of Seedway*

## Broccoli COVINA F1 BROCCOLI

Vigorous plants reliably produce uniform, tight domes. Upright, large-framed plants produced big, tightly beaded heads for reliable harvests. Good for spring or fall.

*High Mowing Organic Seeds*

## Broccoli HYDRA

Medium green smooth domed heads are easy to harvest and are suitable for the bunching and crown markets. Performs best in temperate summer climates. Maturity: 102 days.

*Courtesy of Stokes*

## Broccolini ASPABROC

Resembles a broccoli raab with an asparagus stem and a mild taste. Easy to grow and requires little space. Plants will set three to five shoots and height reaches 20 to 24".

*Courtesy of Siegers*

## Cabbage ALFARO Y.R. F1

Nice round heads, early in maturity, dense and well filled, with a short core. Good wrappers. Very uniform in size and shape. Maturity: 62 days.

*Courtesy of Norseco*

## Cabbage B3158 Y.R. F1

Early cabbage, Cambria type. Dark blue heads, well wrapped, very heavy, of an excellent quality. Short core. Good field holding ability. Also tolerant to white blister rust. Maturity: 55 days.

*Courtesy of Norseco*

## Cabbage BOTRAN F1

Bronco/Grand Vantage type that combines the high quality of Bronco to the good wrappers of Grand Vantage. Stands out due to its high tolerance to black rot. Maturity: 65 days.

*Courtesy of Norseco*

## Cabbage SATIE

Late white cabbage with uniform heads perfect for fresh market. Long storage suitable for growing conditions like hot continental summers.

*Courtesy of Siegers*

## Cabbage SUMMER DISH F1

Flat head. 65 to 70 days after transplanting. Four to six pounds. Tolerant to heat, humidity, bursting and diseases.

*Courtesy of Agrohaitai*

## Cabbage ULTRA VANTAGE Y.R. F1

Storage type cabbage. Large head size and a dense inner core. Hearty plant habit, strong stalk and a high head position. Maturity: 100 days.

*Courtesy of Norseco*

## Cabbage XTREME VANTAGE Y.B.R. F1

Heads stand high for an easy harvest. Excellent wrappers. Strong resistance against black rot and a strong tolerance to tip burn. Maturity: 65 days.

*Courtesy of Norseco*

## Carrot B3136 F1

Cello/jumbo type with high quality roots in both mineral and muck soils. High uniformity of straight and long roots of a perfect shape. Maturity: 63 days.

*Courtesy of Norseco*

## Carrot NAVEDO F1

Very cylindrical roots that stand out for their excellent uniformity and their high yield potential. Smooth and well-filled roots. Maturity: 63 days.

*Courtesy of Norseco*

## Carrot SV7627 F1

New cello/jumbo from Seminis. A complement to SV2384 and Enterprise, offering a higher ratio of jumbo size carrots. For both mineral and muck soils. Maturity: 70 days.

*Courtesy of Norseco*

## Cauliflower FIORETTO 60

A long stem cauliflower with a small head and sweet green stems. Fresh or cooked, it stands out for its taste and sweetness.

*Courtesy of Siegers*

## Celery XP 266

Mid-size frame with appealing green colour. Upright with smooth petioles. Excellent taste and yield. Maturity: 100 days

*Courtesy of Norseco*

## Choy NABAI SPRING F1

Baby Pak Choy. 45 to 50 days after sowing. Size: Four to six inches. Extra slow to bolt. Can be planted in spring, summer and fall. Disease resistant.

*Courtesy of Agrohaitai*

## Dill HERA

Very late bolting dill. Upright growth habit with much leaf mass. Wider harvest window than Bouquet. Suitable for the fresh market and industry.

*Courtesy of Norseco*

## Eggplant ANNINA F1

Prolific yields of upright, spineless fruit. Performs as you expect a hybrid to, but with flavour of heirloom.

*Courtesy of High Mowing Organic Seeds*

## Kale REDBOR F1

Redbor F1's tall, dark red leaves on sturdy stems are full of vigor and grow upright for easy harvests. As with all reds, flavor and color are enhanced by cold weather.

*Courtesy of High Mowing Organic Seeds*

## Leek FENCER

Bluish green, main season leeks. Very uniform, large size and remarkably easy-cleaning long shanks. Maturity: 100 days.

*Courtesy of Norseco*

## Lettuce STANFORD

Stanford offers the leaf shape and texture of a tender butterhead, but has the added benefit of truly upright growth, similar to a mini romaine.

*Courtesy of High Mowing Organic Seeds*

## Lettuce TROPICANA

High quality, full heads. Uniform leaves that retain crispness and flavour throughout the season. Our trials showed this workhorse variety to be a top overall performer in a dry, hot year.

*Courtesy of High Mowing Organic Seeds*

## Melon GODDESS

Like Athena but earlier to ripen. Large (four to six pounds) oval fruits with excellent sweet flavour on healthy vines. Maturity: 66 days.

*Courtesy of William Dam Seeds*

## Melon GOLDEN GIANT F1

Oriental melon. Oblong fruit, average 2.5lb. Crispy and sweet with brix 14 to 16. Resistant to disease. High yield.

*Courtesy of Agrohaitai*

## Onion MONASTRELL

Uniform bulbs with an impressive dark red exterior color and good red interior color. High quality, single-centers. Use as first early red. Limited storage potential. Maturity: 98 days.

*Courtesy of Stokes*

## Onion POCONO

Extra-large uniform round bulbs with long-term storage potential. Widely adapted to areas that use Prince or Fortress and has shown excellent quality out of storage. Maturity: 110 days.

*Courtesy of Stokes*

## Onion RED GENEVA

Flattened bulbs pair well with a yellow cipollini for an early, colorful display. Slightly slower to mature than yellow varieties, but with comparable shape and size. Excellent flavor for eating raw or cooking.

*Courtesy of High Mowing Organic Seeds*

## Onion RED MOUNTAIN

Red long day storage onion. Large storage red onion. Good color throughout bulb. Firm with good storage capability. Maturity: 110 days.

*Courtesy of Seedway*

## Onion SADDLEBACK

Large, uniform, globe shaped bulb. Strong root system permits growth on marginal muck soils, enabling high yield potential. Medium term storage potential. Maturity: 100 days.

*Courtesy of Stokes*

## Onion SSR-BO-14 F1

The darkest and the longest shank of the SSR family. Very erect and uniform. Can be cleaned and attached as fast as the other members of the SSR-BO family. Maturity: 65 days.

*Courtesy of Norseco*

## Onion TRAVERSE F1

Great quality, mid-season onion. Remarkable round shape, firm, small neck and very uniform. Large size bulbs for an excellent yield. Maturity: 98 days.

*Courtesy of Norseco*

## Pea PLS 14

Early, high yielding shelling pea. 24 to 30" tall with plenty of foliage and vigor. Excellent flavor, good for fresh eating or processing.

*Courtesy of High Mowing Organic Seeds*

## Pea PLS 595

High yielding variety produces two large, full pods per stem. Sturdy, compact plants have more tendrils than foliage. Averages eleven peas per pod.

*Courtesy of High Mowing Organic Seeds*

## Pea SV0935QF

Good yields of concentrated sets of uniform colored peas. Sweet taste with good disease resistance. Maturity: 44 days.

*Courtesy of Seedway*

## Pepper CARMEN F1

Early maturing fruit on medium-sized 20" plants can be harvested at green or allowed to ripen to a deep red.

*Courtesy of High Mowing Organic Seeds*

## Pepper ESCAMILLO F1

A golden Corno di Toro-type with crisp, juicy walls and excellent flavor. Prolific yields from vigorous 22" tall plants. Good for eating raw, frying or sautéing.

*Courtesy of High Mowing Organic Seeds*

## Pepper FLAMING FLARE

Quickly ripens to red and adds dimension to any dish. An AAS winning Fresno type with wonderful field performance and productivity. Beautiful shape and colour.

*Courtesy of William Dam Seeds*

## Pepper ORANGE MARMALADE

High yielding, early ripening, sweet and flavorful. Small to medium sized blocky bell fruit. Performs well in open field.

*Courtesy of Siegers*

## Pepper PLACEPACK F1

Large size green pepper that has excellent yields. Very nice uniformity. Very concentrated first set. Large plant. Maturity: 68 days.

*Courtesy of Norseco*

## Pepper SKYHAWK

Early maturing smooth, attractive jumbo sized fruit with a perfect blocky shape and mid green color. High yields with tolerance to BLS 1-10.

*Courtesy of Stokes*

## Pepper SV3964PB (X4R)

Large, high quality, firm, blocky dark green fruit with a strong plant habit. Adapted well for late season harvest. Excellent option for growers in the Northeast. Tolerance to CMV and BLS 0-4. Maturity: 78 days.

*Courtesy of Stokes*

## Pumpkin GUMDROP PMR

Unique flat bottom, and a big, sturdy handle. The avg. 11 to 13 lb. pumpkins are an ideal size for kids, or for accenting any fall display. Short vine allows 24 to 30" spacing in-row.

*Courtesy of Johnny's Selected Seeds*

## Shallot MATADOR F1

Giant, uniform shallots in papery skins. Large, blocky bulbs are easy to process in the kitchen and have the traditional flavor and sugar content of shallots. A vigorous variety that produces two large twin bulbs per one seed.

*Courtesy of High Mowing Organic Seeds*

## Spinach SHELBY F1

Excellent transition variety for spring and fall, with high quality leaf shape and size and strong tolerance to downy mildew. For baby leaf production.

Maturity: 55 days.  
*Courtesy of Norseco*

## Squash BRÛLÉE

A prolific and early producer of stout, personal-sized squashes with traditional butternut color. Very high yields on vigorous plants

*Courtesy of High Mowing Organic Seeds*

## Squash GRANITE

A nice package of uniformity and productivity for the boxing trade. Fruit is smooth with little to no ribbing and carries a refined shape that boxes easily. Maturity: 95 days.

*Courtesy of Seedway*

## Squash SUNSHINE F1 KABOCHA

Flattened globe-shaped fruits have excellent flavor and tender, stringless texture. A great culinary variety for baking, mashing or pies.

*Courtesy of High Mowing Organic Seeds*

## Sweet corn CALIBER XR

Outstanding yield potential on a strong plant, superb eating quality, and an excellent husk package. Great for roadside and shipping markets. Superior across different environments and conditions.

*Courtesy of Siegers*

## Sweet corn FLAGLER

High quality sh2, eight inch, bicolor ear with 16 to 18 rows. Strong plant with broad adaptation and good stress tolerance offering excellent yield potential. Intermediate resistance to Rp1-GFJ Rust. Maturity: 78 days

*Courtesy of Stokes*

## Sweet corn NATURAL SWEET XR F1

Vigorous 5' plants offer ideal ear height for harvesting (20 to 25") and produce uniform ears with great husk coverage and exceptionally sweet, milky kernels.

*Courtesy of High Mowing Organic Seeds*

## Sweet corn NECTAR BICOLOUR QUADSWEET F1

Second Quad Sweet introduction from Crookham. Sweet and creamy, full season corn. Very good germination. Well filled and well-covered cob. Sturdy plant. Maturity: 72 days.

*Courtesy of Norseco*

## Sweet corn SEMINOLE SWEET XR

High quality shipper that combines high yields with superior flavor. Dark green husk package and good husk protection to go along with a clean strong, plant and excellent kernel flavor.

*Courtesy of Siegers*

## Sweet corn SOLSTICE BICOLOUR SH2 F1

Earlier Nirvana type. Particularly sweet and tender variety. Strong emergence. Strong tip fill. Stands out by its great quality, just like Nirvana. Maturity: 67 days.

*Courtesy of Norseco*

## Sweet corn VISTA XR

First early yellow sh2 hybrid with great husk protection and 7.75-8.25 in/19.5-21 cm ear length. An incredible choice for the high quality roadside market. Resistance to RpGDJ and NCLB. Maturity: 69 days.  
*Courtesy of Stokes*

## Tomato COMET F1

Firm, uniform red grapes bred for high yields and vigorous plants. Stay firm and reliable through transportation. Part of High Mowing's exclusive Galaxy Suite tomato collection.  
*Courtesy of High Mowing Organic Seeds*

## Tomato GALAXY SUITE CHERRY

An assortment of cherry and grape tomatoes with outstanding texture, crack resistance and post-harvest shelf life, allowing fruit to maintain quality through transportation and storage.  
*Courtesy of High Mowing Organic Seeds*

## Tomato MIDNIGHT PEAR CHERRY

Dark purple, small pear fruits have wildly cosmic flavor. Irresistible to harvesters and market-goers alike. Part of High Mowing's exclusive Galaxy Suite tomato collection.  
*Courtesy of High Mowing Organic Seeds*

## Tomato PLUM PERFECT F1 PASTE TOMATO

The winner in our trials for a late blight resistant plum tomato. Texture and flavor superior to other late blight resistant plums in our trials three years running.  
*Courtesy of High Mowing Organic Seeds*

## Tomato PROFI FRUTTI CHERRY F1

Indeterminate tomato selected for its excellent productivity. Small, dark red, shiny fruits that weight around 20 g. Brix rate of 10, sweet and delicious fruits. Winner of Les Exceptionnelles 2018. Maturity: 60 days. Untreated seed.  
*Courtesy of Norseco*

## Tomato STARLIGHT CHERRY

Slender yellow grape tomatoes. Slightly late to mature, will continue to ripen until frost. Plants are prolific and require diligent trellising. Part of High Mowing's exclusive Galaxy Suite tomato collection.  
*Courtesy of High Mowing Organic Seeds*

## Tomato SUNGRAZER F1

An orange grape tomato with sun-kissed color and a celestial flavor profile. Firm fruits can hold up to harvest and transport and complete a custom grape mix. Part of High Mowing's exclusive Galaxy Suite tomato collection.  
*Courtesy of High Mowing Organic Seeds*

## Tomato SUPERNOVA CHERRY

A marbled mini-Roma shape with constellations of yellow stripes on a red flesh background. Red flesh with yellow marbeling and a unique mini-Roma shape. Part of High Mowing's exclusive Galaxy Suite tomato collection.  
*Courtesy of High Mowing Organic Seeds*

## Watermelon RED AMBER

Strong, vigorous plant that produces a uniform set of high quality fruit. Interior has a crisp texture and contrasts well with the medium green background and medium dark green stripe.  
*Courtesy of Siegers*

## Watermelon SWEETIE PIE

Knock-out sweet flavor, slightly crunchy texture and very juicy flesh! Fruit have a dark, thin, shiny rind. Replaces Jade Star.  
*Courtesy of Siegers*

## Zucchini BLACK JADE

Cylindrical fruits in shiny dark green color. Resistant to PM and virus. Maturity: 40 - 45 days.  
*Courtesy of Agrohaitai*
