

## Bean Celine

Vibrant, dark-to-light purple wax beans with contrasting yellow interior. The first purple wax beans on the market. Plants are healthy producers of uniform beans on robust, bush-habit plants.

*High Mowing Organic*

## Bean Jaguar

57 days. Very dark variety that like heat. Shiny pods, easy to pick and clean. Excellent taste.

*Norseco*

## Bean Magnum

Uniform, flat and extra-tender bush bean with Kentucky Wonder flavour. Prolific producers set fruit high on the plant and are a great substitute for Kentucky Wonder pole beans where space and/or trellising are an issue.

*High Mowing Organic*

## Beet Betty

Approx. 50 days. Round, smooth, red roots with a small crown. Very healthy leaves. Suitable for early planting. Fresh market and baby leaf.

*Stokes Seeds*

## Bok choy Bopak F1

Compact plants host densely growing, brilliant green leaves on striking white stems. The first organic hybrid bok choy on the market and an AAS winner, plants are exceptional in form, flavour and performance, and extremely slow to bolt.

*High Mowing Organic*

## Bok choy Chun Mei #2 F1

Baby-type Shanghai bok choy. Very slow bolting; good for sowing in spring, summer and fall.

*AgroHaitai Ltd.*

## Bok choy Tall Stem Slo F1

Full-sized bok choy. Slow to bolt; can be sowed in spring, summer and fall.

*AgroHaitai Ltd.*

## Broccoli Green Island #2 F1

A hybrid between broccoli and Chinese kale. The plant continues producing mini broccoli for over a month.

*AgroHaitai Ltd.*

## Brussels sprouts Scorpius

112 days; high-yielding Brussels sprout that is very round, even-sized, firm and very clean. Sprouts are easy to snap off the stalk, and the leaves shed well. The leaves have a short stem with medium-small round leaves.

*Seedway*

## Cabbage Green Lunar F1

80 days. Small, flat cabbage; beautiful bright green colour. Uniform semi-erect plants. 1.5-2 kg. Tolerant to bursting. Autumn harvest recommended.

*Norseco*

## Cabbage CR Spring Jewel F1

Full-size Napa cabbage. Resistant to clubroot. Dark green outer leaves; yellow interior. Slow bolting. Good for sowing in spring and fall.

*AgroHaitai Ltd.*

## Carrot Intrepid

Adaptable cello-type carrot with great tops and smooth, tapered roots. Intrepid averages 10" in length and has a bright internal orange colour.

*Seminova*

## Carrot

Jackson (B-3136)

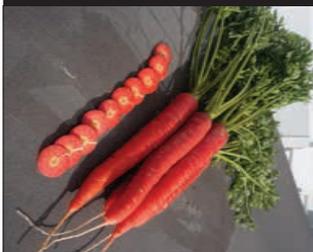

88 days; early main maturity jumbo Imperator/Cello carrot. Vigorous, upright, healthy tops. 9-11" jumbo sized roots. Smooth and attractive root appearance. IR: Ad

Seedway

## Carrot

Redsun F1

Crunchy texture. Bulks up early producing 7-9" cylindrical Nantes-type with good tops. Unlike other red types, Redsun is not prone to bolting. An excellent addition to coloured bunches at market.

William Dam Seeds

## Cauliflower

Clementine

70-75 days. With an eye-catching and distinct deep orange curd colour, this variety boasts a strong, healthy and vigorous plant. An ideal variety for most temperate growing locations. For shipping, fresh market or processing.

Stokes Seeds

## Cauliflower

Twister

75-80 days. Heads are tight, heavy and bright white with a fabulous spiraling internal wrap. Very uniform harvests. Well adapted to most areas. Prefers heavy soil.

Stokes Seeds

## Chicory

Benefine

Heads of deeply cut leaves with self-blanching, creamy hearts. A beautiful frisee-type chicory with excellent resistance to tip burn and good bolt tolerance. Plants grow in thin, highly uniform heads.

High Mowing Organic

## Cucumber

Shintokiwa

Long, thin-skinned fruit with a small seed cavity. Vigorous plants produce long, slender fruit that resists bitterness as they mature. Even when harvested at a larger size, fruit is juicy with bright, crisp texture and vibrant flavour.

High Mowing Organic

## Eggplant

Asian Delight

Slender, elongated eggplants are glossy with bright purple skin and white, tender, non-bitter flesh. Tender skin does not need to be peeled. Plants are upright and semi-spineless, so they are very easy and painless to harvest.

PanAmerican Seed

## Eggplant

Fairy Tale

Early maturing, highly productive variety produces clusters of attractive white fruit with violet/purple stripes. Elongated teardrop-shaped fruit are sweet and non-bitter, with a tender skin and few seeds. Fruit can be harvested when very small or fully mature.

PanAmerican Seed

## Eggplant

Shikou F1

Glossy, deep purple fruits on productive, semi-spineless plants with upright, open habit. A week earlier than Ping Tung Long, fruits have bright white interior flesh with a purple calyx and very few seeds. Plants are productive and highly ornamental.

High Mowing Organic

## Endive

Eliance

Smooth-leaved endive with upright growth habit for field or greenhouse production. Heads are smooth, uniform and elegant with long, narrow and flexible internal leaves. Plants are self-bleaching with resilient bases.

High Mowing Organic

## Kohlrabi

Superschmelz

Late-season giant kohlrabi with tender, sweet flesh that holds quality in storage. Performs well in a high tunnel, under fabric, or in the field. The white bulbs have a thin, supple skin. Bulbs are globe-shaped and plants are highly resistant to bolting in heat.

High Mowing Organic

## Leek

Lancelot

Uniform 12-14" shafts with excellent thickness and bolt resistance. Open pollinated; dependable, producing long, white shafts with dark green flags. Suitable for summer and early fall harvests in cooler climates and late fall and overwintering in warm climates.

High Mowing Organic

## Lettuce Bellevue

Glowing red oak leaves emerging from a bright green core for mini or full-size head production. Holds well in the field; resistant to bolting during variable weather for all-season production. Texture is buttery but durable enough for washing and spinning.  
*High Mowing Organic*

## Lettuce Saladin

Thick, crispy leaves are sweet and refreshing; classic iceberg taste. Large, tightly wrapped heads. Glossy, dark green leaves are tender at the leaf margin and thicken towards the root. Excellent field holding quality and extended cooler shelf-life post-harvest.  
*High Mowing Organic*

## Lettuce Xalbadora

All the best traits of a full-sized, green romaine in a mini, highly disease-resistant package. Sweet flavour and excellent texture make this a desirable variety for harvest at all stages of growth.

*High Mowing Organic*

## Melon Black Pearl #2 F1

Indian bitter melon. Dark green fruits with blunt spines. Average 9-10". Early maturity and high yield.

*AgroHaitai Ltd.*

## Melon Geumbo F1

Korean melon. Oblong fruits. White flesh is crispy, sweet with Brix 16-17 per cent. High yield.

*AgroHaitai Ltd.*

## Onion Barolo

This early onion has a very vibrant, dark red, shiny exterior colour with attractive dark red interior rings. It adapts well to direct seeding or transplanting. Barolo offers excellent storage results.

*Seminova*

## Onion Venecia F1

105 days. High percentage of large bulbs. Very uniform round shape. Good quality dark skin. Mid-term storage.

*Norseco*

## Pepper Biquinho White

Plants grow well in pots both indoors and outdoors, with very high yields of several hundred pods. Pods are small with good flavour.

*Atlantic Pepper Seeds*

## Pepper Black Panther

Superhot variety; a real looker with black stems, dark leaves and pods that start out dark green/black then ripen to a bright orange with a purple/black haze. Pods are extremely hot with good ghost peppers flavour. SHU 1,200,000+

*Atlantic Pepper Seeds*

## Pepper Brocanto F1

Sturdy, tall plants with excellent disease resistance; produces an abundance of blocky, yellow fruits. Plants are resilient, performing well in the field or high tunnel with exceptional leaf coverage.

*High Mowing Organic*

## Pepper Jalafego F1

Productive, vigorous plants yield multitudes of extra-long, extra-smooth, dark green fruit. Highly disease-resistant plants tolerate and produce through many climatic variables.

*High Mowing Organic*

## Pepper PeppiGrande Red

Corno-shaped sweet pepper; crisp texture, rich flavor and more sweetness than large-fruited peppers. Often seedless. To produce fully seedless fruit, grow PeppiGrande Red in isolation from other (non-seedless) pepper varieties.

*PanAmerican Seed*

## Pepper Saco de Velho

Habanero-type with big, yellow, wrinkly pods with good heat. Plants grow medium to large – 3-4' high – and can carry loads of pods. SHU 100,000.

*Atlantic Pepper Seeds*

## Pepper Sailfish

Early maturing red bell pepper for fresh market, with high-quality, blocky, smooth fruit and excellent colour. Fruit can ripen on the plant for high quality harvest. Improved disease resistance.

*Stokes Seeds*

## Pepper SV4815

70 days. High-quality blocky yellow bell pepper. Concentrated fruit set. Fast colour change. Bacterial leaf (races 1-10) tolerant.

*Norseco*

## Pepper Tarpon

Main-season green bell pepper. Compact plant with dark green, block fruit. High yield potential. X10R technology for resistance to Bacterial Leaf Spot races 0-10. High Phytophthora resistance.

*Stokes Seeds*

## Pumpkin Bad Jelly F1

95 days. Unique warty pumpkin in a banana yellow colour. 5.5-7 kg. Average size vine.

*Norseco*

## Pumpkin Bellatrix F1

Bright orange carving pumpkin with powdery mildew resistance. Plants are vigorous, yielding large 20-25 lb. pumpkins. Nearly perfectly uniform, an excellent option for commercial producers. Strong stems dry well for ease of transportation.

*High Mowing Organic*

## Pumpkin Fool's Gold

90 days; 11-12 lb. pumpkin with upright fruit shape. Unique tan color is great for the niche market. Trial co-operators say, "It is definitely different enough that it catches people's eye and looks good in an orange-and-white pumpkin mix."

*Rupp Seeds*

## Pumpkin Hot Chocolate F1

95 days. Attractive little pumpkin in a unique chocolate-brown colour. Solid handle; average vine. High yield of fruits that reach 2.5-3 kg.

*Norseco*

## Pumpkin Mellow Yellow F1

100 days. Impressive and eye-catching lemon yellow pumpkin. Round, ribbed fruit. 5.5-7 kg. Strong, straight handle. Semi-vine has intermediate tolerance to powdery mildew.

*Norseco*

## Pumpkin White Gold

A new generation of white pumpkin with uniform fruit and a well-attached black handle. The 7 1/2" wide by 8 3/4" tall fruit have nice ribbing and a classic pumpkin shape.

*Rupp Seeds*

## Potato Magic Molly

All-purple fingerling potato with excellent flavour and appeal. The dark purple, almost-black colour of the skin and flesh are retained when boiled, roasted or baked. Can be harvested early as new potatoes. Excellent yields with some field resistance to late blight.

*High Mowing Organic*

## Potato Peter Wilcox

Abundant yields of round-to-oblong purple potatoes with vibrant, golden flesh. The bright purple exterior of these earthy-flavoured potatoes has striking visual appeal. The firm flesh makes it a versatile potato for the dinner plate.

*High Mowing Organic*

## Radish Bodiam

21 days. Early variety for spring and fall. Bright red exterior with a contrasting pure white interior. Healthy and durable foliage with a strong attachment point for easy handling and mechanical harvesting. Uniform bulbs with good tolerance to cracking.

*Norseco*

## Rutabaga Appalaches (No. 80)

85 days. Laurentien-type with better tolerance to cabbage maggot. Larger calibre than the York variety. Higher attachment of the foliage for an easier cleaning. Nice purple colour.

*Norseco*

## Spinach Space F1

Vigorous, all-season spinach with thick, glossy leaves that are smooth to slightly savoyed. A favorite variety of commercial growers; plants are highly resistant to downy mildew and perform well in variable weather for all-season production.

*High Mowing Organic*

## Squash Paula

95 days; uniform and productive butternut squash. Boxes easily and has performed well in Northern production areas. 4" x 9", 3.5 to 4.5 lbs.

*Seedway*

## Squash Ugly Dumpling

Rupp exclusive. While its "dirty brown" exterior may not be what consumers are used to seeing, its true beauty is on the inside. Ugly Dumpling is one of the best-tasting winter squash varieties you will ever eat. Also great for fall decoration.

*Rupp Seeds*

## Squash Winter Sweet F1

Pale, greyish-blue fruit with flaky textured flesh and complex flavor that improves in storage. Rates highly both in flavour profile and productivity. The flavour improves after 2-5 months of storage, making for great off-season sales.

*High Mowing Organic*

## Sweet corn Cadence XR

78 days. Bicolour supersweet. 7.5-8.25" ear. 16-20 kernel rows. Full-season with high eating quality. Ideal ear size for roadside markets. Attractive husk package with good flag leaves. Resistance to common rust.

*Stokes Seeds*

## Sweet corn Epiphany F1

75 days; supersweet bicolor. 8" long, 16 rows of small and juicy kernels. From the Nirvana series, with improved germination and harvest ease. Better tolerance to diseases; good tolerance to common rust. Exceptionally sweet and tender taste.

*Norseco*

## Sweet corn Evolution F1

70 days; SeSh2 bicolor. Synergistic Plus with increased supersweet kernels for added sugar; however, can be grown with other synergistic varieties. Attractive outside package and good tip coverage. Good cold soil emergence; extended field-holding ability.

*Norseco*

## Sweet corn Nighthawk

68 days. Bicolour supersweet. 8" ear size. 16-18 kernel rows. Early maturity with excellent eating quality. Good tip fill and husk cover. Well-adapted for early local and roadside markets in the Northeast.

*Stokes Seeds*

## Sweet corn Xanadu

74-75 day bicolor from Crookham. Xanadu is part of the Nirvana series of sweet corn, with unique taste and texture; elevated seedling vigour, eating quality, and post-harvest shelf life.

*Rupp Seeds*

## Swiss chard Rhubarb Supreme

Deep red-stemmed chard with vibrant green leaves. Product of a breeding project conducted by Dr. John Navazio, Nash Huber of Nash's Organic Produce and the Organic Seed Alliance, this chard variety is an improvement on the classic "rhubarb" type.

*High Mowing Organic*

## Swiss chard Sunset

Bright yellow stems that vein beautifully into glossy, broad, green leaves. Plants are large and uniform. Performs well in variable weather, exhibiting exceptional quality as a microgreen, when harvested as a baby leaf and when grown to full-size for bunching.  
*High Mowing Organic*

## Tomatillo Super Verde F1

Improved plant habit, fruit uniformity and higher yields. Plants are strong, vigorous and have good leaf cover. Produces heavy yields of extra-large firm fruits with attractive bright green husks. Fruits store well after harvest. Pick when bright green for the best flavour.  
*William Dam Seeds*

## Tomato Cuba Libre F1

Pink fruits with a clean, round appearance on vigorous, tidy plants. All the beauty of an heirloom with the vigour of a selected hybrid. Compact plants produce abundantly in the greenhouse.

*High Mowing Organic*

## Tomato Mountain Man

A new fresh market tomato from Syngenta; ideal for the eastern summer production season. The strong plant produces extra-large fruit with delicious flavour. Tomato spotted wilt virus resistance.

*Rupp Seeds*

## Tomato Plum Regal F1

Medium-sized, determinate plants produce high yields of blocky plum tomatoes. Plants are compact with good leaf coverage and a strong disease package. Fruit are deeply coloured and flavoured; excellent for sauces and canning.

*High Mowing Organic*

## Tomato Roadster

67 days; determinate salad variety with early maturity and extra-large size. Attractive, red, firm and smooth-shouldered fruit with superior flavour. Suited for both mature green and vine-ripe markets. Concentrated set and very high yield potential.

*Seedway*

## Tomato Strawberry Cherry

Excellent for both outdoor growing and commercial greenhouse production; heavy cascades of strawberry-pink multi-cluster fruit on indeterminate vines; sweet-tangy flavour.

*Fiona Hamersley Chambers for Metchosin Farms.*

## Tomato Torinjina

Early golden-orange organic cherry tomatoes on balanced plants. Produces high yields of mid-sized fruits. Not prone to cracking and hold up well after harvest. Indeterminate plants; good leaf cover and well behaved. Works well in open field and high tunnel.

*William Dam Seeds*

## Watermelon Belmont F1

Weighs in at 6-8 lbs.; big on flavour with dark red juicy flesh, no seeds and excellent texture. It has an attractive dark green rind with a tiger stripe. Fruits are attractive and uniform. A productive variety with multiple fruit sets on strong, vigorous vines.

*William Dam Seeds*

## Watermelon Blackjack

85 days; seedless. Nice oval shape with outstanding internal red color. Firm flesh is extremely flavourful. Strong disease package. HR: Co:1, Fon:1, Sf

*Seedway*

## Watermelon Cracker Jack

80-82 days; seedless; Seedway exclusive. Consistent yields over wide range of growing conditions. Very uniform fruit shape, firm flesh and deep red interior. If you are catering towards bins or cartons, this variety should be on your farm. 13-17 lbs.

*Seedway*

## Zucchini Bi Zhu F1

Globe-shaped fruits. Shiny, dark green colour.

*AgroHaitai Ltd.*
